Only Presentation:

Mark Asheness with CE Group presenting for Mini Storage project.

The plans submitted exceed buffer requirements on all sides and call for existing vegetation to be untouched as much as possible. Commission members were generally pleased with this and the overall plan as presented. However, they asked for the following changes: the grassy areas on the slopes of the property are to be left natural, not cut; the lighting to have motion sensor activation; and lastly to move one light on the southern side of property so that it does not disturb adjacent neighbor.

Mr. Asheness agreed to these changes.
