Hi Dan,

My name is Pat Gallarelli, I live on Seaforth Rd directly adjacent to the OWASA property planned for the WIP project. I have met with the WIP folks (Jeff Adkins, Inga Kennedy) and gave input at the last commissioners meeting concerning the site and plant, *but no one is talking about the water main design and routing which is potentially more impactful.*

So I would like to go on record asking that the zoning change not be permitted until there is more information provided concerning the design and potential impact of the required water mains to Chatham Co and Durham. The right of way in front of my property is 75ft, all of the materials provided by WIP I've seen shows it to be 100ft. This needs to be resolved before WIP is permitted to run a huge pipe down Seaforth Rd across my property. I'd also like to see how they plan to run the pipe along the steep grades on the side of Seaforth Rd that run down to Jordan Lake feeder creeks. Water towers, Access portals and boosting stations will probably be needed. Where will these be?

Anyway if you could add this to the discussion I would appreciate it. Not sure I need to speak again, but I do plan to be at the Feb 6 meeting. Please let me know you got my note.

Thanks Much,

Pat Gallarelli 984-214-9703
