Soil Erosion and Sedimentation Control

LETTER OF APPROVAL – REVISED PLANS

May 15, 2024

Zadell Development, LLC (Kyler Zadell)
218 Edinburgh Drive
Cary, NC, 27511-6408

Project Name:	Anfield Estates
Project Number:	WP-24-46
Acres Approved:	3.27
Submitted by:	CE Group, Inc.
Date Received:	5/14/2024
Reason for Revision:	Plan changed since original Letter of Approval for erosion control was issued.

To The Above Named Person(s) and/or Entity,

This office has reviewed the revised erosion and sedimentation control plan. We find the plan to be acceptable and hereby issue this Letter of Approval.

Erosion and Sedimentation Control Plan: This plan approval shall expire (2) years following the date on this Letter of Approval, unless a Land-Disturbing Permit has been obtained within that initial two-year period and remains in effect as provided in Section 164.12 (H). Active sites may have the permit renewed by applying for renewal 30 days prior to expiration.

Section 164.10 (L) of the Chatham County Sedimentation and Erosion Control Ordinance requires that a copy of the approved erosion control plan be on file at the job site.

North Carolina's Sedimentation Pollution Control Act is performance-oriented, requiring protection of existing natural resources and adjoining properties. If, following the commencement of this project, the erosion and sedimentation control plan is inadequate to meet the requirements of the Chatham County Sedimentation and Erosion Control Ordinance, this office may require revisions to the plan and implementation of the revisions to ensure compliance with the Act.

Acceptance and approval of this plan is conditioned upon your compliance with county, state and federal water quality laws, regulations and rules. In addition, local city or county ordinances or rules may also apply to this land-disturbing activity. This approval does not supersede any other permit or approval.

Inspections: This letter gives the notice required by G.S. 113A-61.1(a) of our right of periodic inspection to ensure compliance with the approved plan.

Section 164.12 (I) of the Chatham County Sedimentation and Erosion Control Ordinance requires self-inspections and monitoring for all sites receiving a Land Disturbing Permit. These inspections can be done by the Financially Responsible Party, or an agent thereof. These inspections must occur

at a minimum of once a week and within 24 hours of any rain event of 1.0 inch or greater. Copies of inspection records and reports must be kept on site and produced to Chatham County upon request.

NPDES General Stormwater Permit NCG010000: Please be aware that your project is covered by the new NPDES General Stormwater Permit NCG010000 (Construction Activities). **If you have already applied for and received coverage, you are required to provide updated information regarding your project to the North Carolina Department of Environmental Quality's Division of Energy, Mineral, and Land Resources by filing a "Modification Form". This can be found at <https://deq.nc.gov/NCG01>.**

Land-Disturbing Permit: Active sites may have the permit renewed by applying for renewal 30 days prior to expiration. Chatham County's Land-Disturbing Permit must be posted at the job site.

Please note that this approval is based in part on the accuracy of the information provided in the Financial Responsibility Form, which you provided. You are requested to file an amended form if there is any change in the information included on the form.

Respectfully,

Justin Hasenfus, CPESC
Erosion Control Program Manager
Chatham County Watershed Protection Department
