

Chatham County Planning Board Agenda Notes

Date: September 3, 2024

Agenda Item: VII-2

Attachment #: None

- Subdivision**
 Special Use Permit
 Rezoning Request
 Other:

Subject:	A legislative request by Qunity, PA to rezone Parcels 18750, 18896, 18897 from CD-CC Conditional District Compact Community to CD-O&I Conditional District Office & Institutional for a church/place of worship, being a total of 50.117 acres, located at 9780 US 15-501 N, Williams Township.
Action Requested:	See Recommendation
Attachments:	All submittal documents, emails of support or non-support, and any additional information can be viewed on the Planning Department website under Rezoning & Subdivision Cases, 2024

Introduction & Background:
 A legislative public hearing was held August 19, 2024. Planning staff presented the request, and the applicants also made a presentation and were available for questions. No one from the public spoke.

The applicant stated they will be utilizing an underground drip system for the wastewater so there will nothing visible from the ground surface, they are designing the facility to compliment existing commercial in the area, they have added additional buffering, and are working with NCDOT on creating the safest traffic flow possible.

These parcels were rezoned in February 2022 for a Conditional District Compact Community use for a 55+ development with 151 single family dwellings, a congregate care facility, daycare/offices, community garden, and barn for event space.

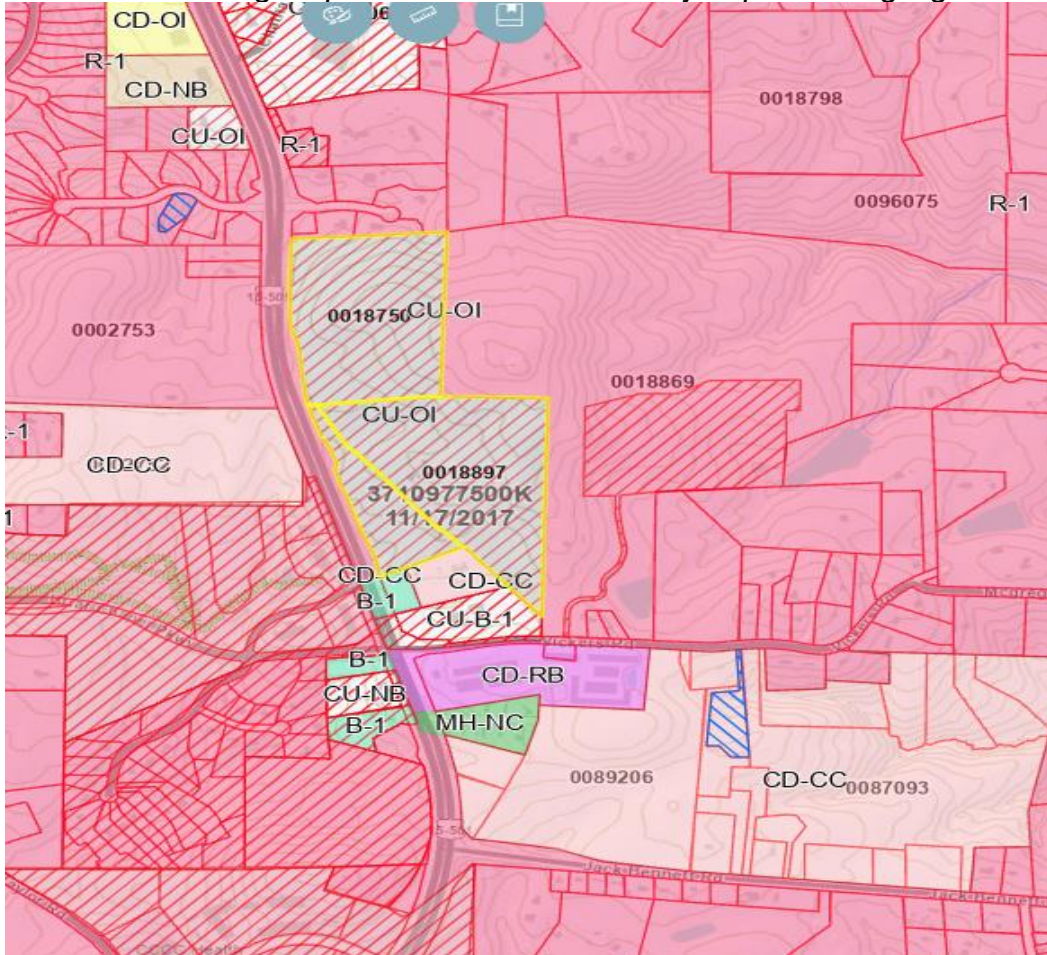

The main concern voiced by the Commissioners during the public hearing was that the Traffic Impact Analysis (TIA) referenced up to 3,000 total trips one day a week on Sundays, concerned that the design wasn't in keeping with the surrounding area (rural character and existing businesses), preservation, number of parking spaces needed, the size of the main building, and what the benefit to the county would be since they are not required to pay property taxes under the non- profit exemption law.

Based on the traffic analysis provided with the Herndon Farms rezoning in 2022, the

expected trips per day at build out would be 1,616. Over the seven-day period, that would equate to 11,312 total trips per week. The development was proposed to have 150,000 sf of non-residential buildings.

Since the public hearing, the Planning Department has received numerous emails both in support of and opposed to the rezoning for a church. A majority of the emails are from residents that are not adjacent to or adjoining the site but from Farrington Village, Governor's Club, Briar Chapel and other areas.

The current zoning map of the area with the subject parcels highlighted in yellow

Discussion & Analysis:

When determining whether a rezoning request should be approved under Section 5 Conditional Zoning Districts, the following findings must be supported.

1. **The alleged error in the Ordinance, if any, that would be remedied by the proposed amendment with a detailed explanation of such error in the Ordinance and detailed reasons how the proposed amendment will correct the same.** No errors are being claimed.
2. **The changed or changing conditions, if any, of the area or in the County generally, which make the proposed amendment reasonably necessary to the**

promotion of public health, safety, and general welfare. Population growth in the county has risen considerably over the last five years. It is expected to continue to increase with new developments already in the queue and more on the horizon. There are four other churches one mile or more from this site. They are all denominations and a couple have served the community for over 150 years.

This facility has a team of people to ensure traffic movement into and on the site to make safety a top priority. At build out, the busiest day will be Sundays. There will be smaller anticipated weekly meetings and events during the week.

A property owner adjacent to the northern property line in Hidden Oaks has requested they maintain at least the 100 ft buffer that was provided with the Herndon Farms rezoning. The property owner adjacent to the eastern property line, where an existing solar farm is located, has also requested a 100 ft buffer.

A community meeting was held April 29, 2024 and the applicant received general questions about site development. The Planning Department has received one specific concern about outdoor noise such as music. Staff advised that is something that, if the Commissioners want, can be conditioned if approved. Also, the county has a Noise Ordinance which would apply. There will be general outdoor recreational activities or gatherings on the grass field as part of their activities.

3. The manner in which the proposed amendment will carry out the intent and purpose of any adopted plans or part thereof.

- Chapter 2, Issues and Opportunities, the plan notes that churches remain central gathering places in towns and rural townships in the County. This property is adjacent to residential and commercial uses. Per the definition of Compact Residential seen below, churches are specifically mentioned as part of the community fabric. Pg. 18 under Rural Character also specifically mentions churches as supporting rural character and preservation of natural features. The site will preserve approximately 18 acres of forested land, they have set the building back approximately 500 ft from US 15-501 and will have the stormwater ponds and underground drip septic system exposed to provide the look and feel of open pastureland and natural habitat. The site plan also shows a greater than 50 ft buffer off the intermittent stream located in the northeast corner of the site in an effort to protect unique assets and native species of the area.
- Chapter 3, Goal 5, Conserve Natural Resources by maintaining and restoring quality and quantity of groundwater and surface water resources. The proposed stormwater control measures will maintain pre-development hydrological patterns, create additional surface waters that provide wildlife habitat, and help stormwater infiltrate to recharge groundwater supplies. The existing wildlife corridor will also be maintained.
- Chapter 4, page 61, Land Use notes that Compact Community nodes should include a mix of land uses, with residential, commercial, and civic components. The church would add a civic component to the healthy mix of

land uses in the area.

Comprehensive Land Use Plan Map; Compact Community node

COMPACT RESIDENTIAL

- Mix of detached and attached residential units complemented by a variety of open spaces. Mix of uses include single family detached and attached units and some multifamily units. Community centers, amenities, recreational uses, schools, and churches may be part of the fabric.
- Buildings: Mostly 1- and 2-story, some 3 story
- Streets: connected system of local and collector streets with access to surrounding development
- Public/open space: Range of types (from large natural resource areas to small pocket parks and gardens)
- Locations:
 - Current extent of Compact Communities Ordinance within 1 mile of community centers (transit potential)
 - Wastewater service (private or proposed public)
 - In close proximity to Employment Centers, but not in conflict with industrial operations
 - In areas not in conflict with high value natural resources

47

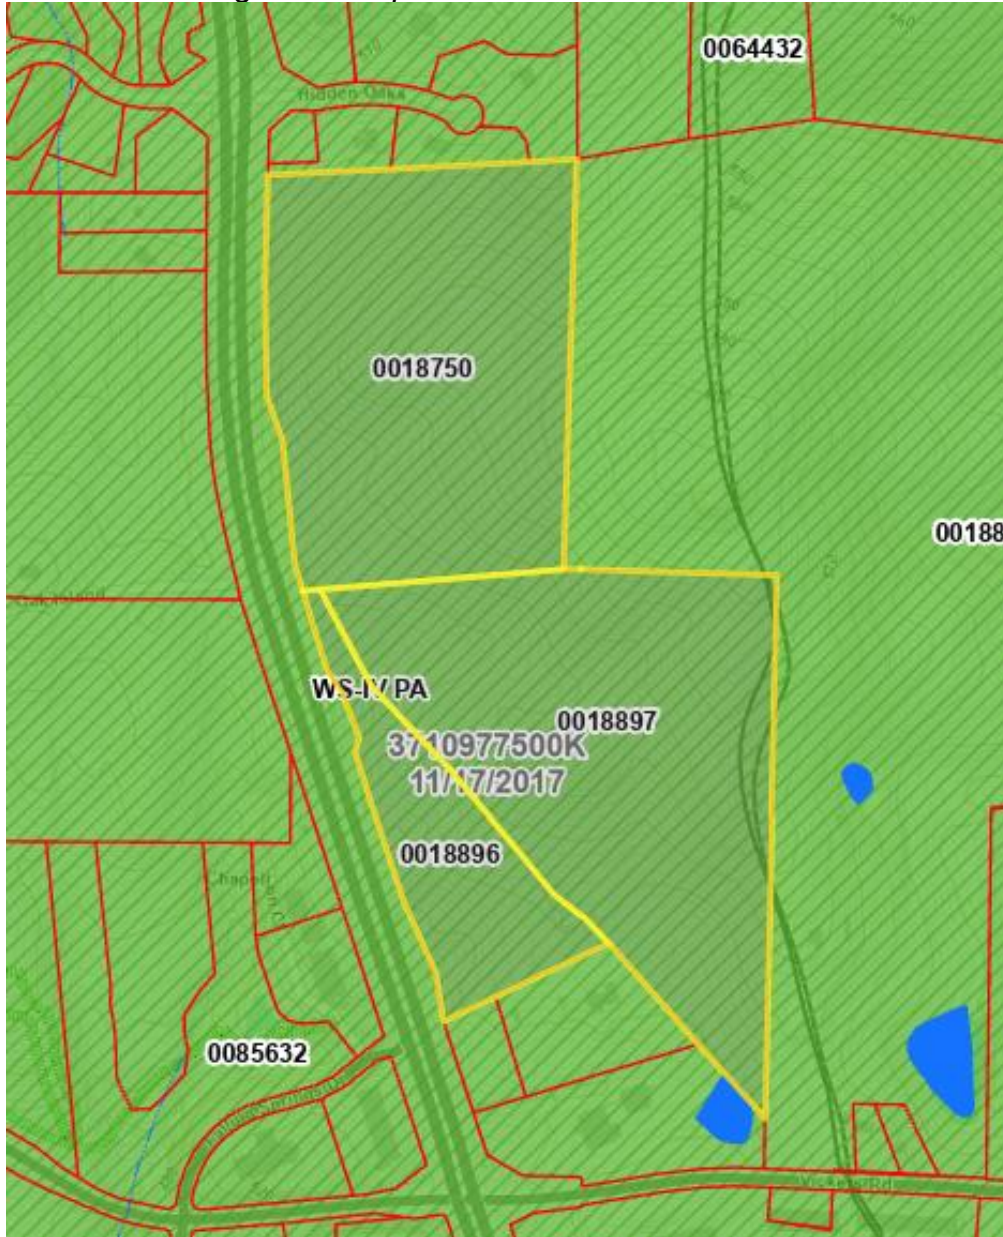

4. **The requested amendment is either essential or desirable for the public convenience or welfare.** The church will provide a specific service to the community and surrounding areas, especially in areas that are becoming very populated with residential development. Because the applicants want to be respectful of the viewshed from the roadway and to soften the appearance of commercial in a rural setting, they have located the building approximately 500 ft from the 15-501 road frontage. The zoning district which has been applied for only requires a 40 ft front setback. They will be preserving existing mature woods around the northern and easter property line and installing approved landscaping in areas as noted on the submitted landscape plan. That plan was reviewed by the Appearance Commission on April 24, 2024, and recommended for approval.

There are two signs proposed at the two entrances of the property that will be under 10 ft in height and have a sign copy of area that will not exceed the Ordinance limit of 50 sf.

5. **All other circumstances, factors, and reasons 18750 which the applicant offers in support of the proposed amendment.** The property will be served by county water and a private underground drip septic system. NCDOT will be required to review, approve, and issue commercial driveway permits for both entrances.

The site is within the WSIV-Protected Area watershed of Jordan Lake and is limited to no more than 36% impervious surface (BUA). The site plan show 21.5% proposed.

Recommendation:

The Planning Board has up to three meetings in which to make a recommendation to approve or deny to the Board of Commissioners. If recommended for approval, a consistency statement has been provided for consideration:

- The rezoning request is consistent with the comprehensive plan by being located within a compact community node where churches are specifically mentioned as part of the fabric of development.

Also, if recommended for approval, the following conditions shall be considered and approved as part of any approval going forward:

Site Specific Conditions

1. The recommendations from the Chatham County Appearance Commission (CCAC) shall be followed as stated in the minutes and as shown on the site plan. The planning staff and CCAC may conduct routine inspections of the property to ensure compliance with the landscaping requirements.
2. A building permit shall be applied for and approved for construction within two years from the date of this approval or the use becomes null and void. Should an extension be needed, a timely revision to this approval must be filed with the Planning Department and go through the revision process.
3. Events that provide outdoor music, whether live, DJ or otherwise, shall comply with the Chatham County noise ordinance and be turned off no later than 10pm following said outdoor event.
4. A 100 ft buffer shall be provided from the northern property line that abuts the Hidden Oaks residential housing.

Standard Site Conditions

5. The application, standards and adopted regulations of the applicable ordinances and policies, and the approved recommendations as provided for and/or conditioned, are considered to be the standards as set forth and shall comply as stated. Changes to or variations from any requirements of this permit must be approved through the Planning Department or other approving board before any such changes can take place.
6. All required local, state, or federal permits (i.e. NCDOT commercial driveway permits, NCDWQ, Chatham County Land and Water Resources, and Environmental Health Division, etc.) shall be obtained, if required, and copies submitted to the Planning Department as part of the platting process.

Standard Administrative Conditions:

7. Fees - Applicant and/or landowner shall pay to the County all required fees and charges attributable to the development of its project in a timely manner, including, but not limited to, utility, subdivision, zoning, and building inspections.
8. Continued Validity – The continued validity and effectiveness of this approval was expressly conditioned upon the continued compliance with the plans and conditions listed above.
9. Non-Severability – If any of the above conditions is held to be invalid, this approval in

its entirely shall be void.

10. Non-Waiver – Nothing contained herein shall be deemed to waive any discretion on the part of the County as to further development of the applicant's property and this permit shall not give the applicant any vested right to develop its property in any other manner than as set forth herein.
